

SAMUEL-HEATH
COLLECTION OVERVIEW

LANDMARK INDUSTRIAL

The high precision engineering adopted in the manufacture of the **Landmark** range mirrors the innovative principles of the **Bauhaus** school

Landmark consists of two distinctive collections: **Industrial** with its contemporary, bold and urban styling and **Pure** with its well-balanced, concise and direct lines. Every component is individually engineered and developed by our team of designers. Scale and proportion, functional efficiency and choice of materials are aided by photo-realistic imaging and the latest in rapid prototyping technology.

The result is an authentic reflection of the era but with an individual identity secured by the finest craftsmanship. Bauhaus was about designing a way of living and at Samuel Heath we believe that the impressive performance of a thermostatic shower valve or basin tap and the satisfying proportions of an accessory piece should be daily delights.

“Our guiding principle was that design is neither an intellectual nor a material affair, but simply an integral part of the stuff of life, necessary for everyone”

Walter Gropius
Bauhaus founder

LANDMARK INDUSTRIAL

Much of what is now regarded as contemporary design is rooted in Bauhaus. Landmark Industrial is faithful to the rational functionalism redolent of Bauhaus and a modern interpretation of the values and style of the designs it pioneered.

Perfect function and beautiful form, achieved by the use of the finest materials and a selection of finishes that delight the senses, are also the values embedded in Samuel Heath's long manufacturing tradition.

These core values of acute attention to detail and the use of innovative processes are identified in each expertly manufactured piece of Landmark Industrial. The collection fuses raw with refined in a celebration of contemporary design.

LANDMARK PURE

MINIMAL EMBELLISHMENT AND A DECEPTIVELY SIMPLISTIC COMPOSITION.

The elemental lines of Landmark PURE reflect the modernist principles of Bauhaus inspired design

Landmark Pure has overtones of the original Bauhaus aesthetic and builds on the foundations of Samuel Heath's Fairfield and Style Moderne Collections, both of which were inspired by dynamic and hugely influential periods in our cultural and industrial heritage.

Pure does not attempt to be a faithful reproduction of the products of Bauhaus, rather it utilises a design language that evokes the ethos of the period in an authentic manner.

By size and proportion it displays and celebrates elements of its functionality achieved through a harmony of materials, finishes and exquisite detailing. Pure is neutral and balanced with concise and direct lines.

STYLE MODERNE

50

Style Moderne is a highly distinctive collection of taps, showers and bathroom accessories inspired by the grace and glamour of the Art Deco period of the 1920s and 1930s. The elegance of this collection is an authentic reflection of the era yet its individual identity is secured with a modern interpretation. With the Style Moderne collection, Samuel Heath has reinterpreted one of the most dynamic and influential design periods in history.

V2K12GBC in SSF stainless steel finish with gloss black chrome levers

Fairfield taps, showers and bathroom accessories are a balanced combination of the diverse formal design influences of the Arts and Crafts and Aesthetic Movements which flourished between 1880 and 1910

V2K6XGBC in SSF stainless steel finish with gloss black chrome levers

68

V2K145B in CP chrome plate finish with black geometric crystal levers

Fairfield

69

V2K475B and **V2K145B** in **CP** chrome plate finish

A contemporary bathroom in which the modern character has been accentuated by traditional design features. Bringing classical detailing to a contemporary aesthetic was the core principle at the heart of this project. The brief given to Latham Interiors was to create an elegant feel while maintaining an overall sense of calm.

A muted grey tiling pattern provided a foundation of sophistication for a contemporary and sleek interior to be created. The free standing white bath, seamless shower and geometric accessories all exemplify the clean and unembellished design ethos at the core of many contemporary spaces.

Taking design cues from the Arts & Crafts movement, the flowing curvilinear facets of the Samuel Heath brassware are perfectly suited against the clean curved lines of the bath. The classical forms of the Fairfield collection coincide with the classically shaped vanity unit and traditional light fittings. The crystal levers exude luxury and the contemporary elements of the taps demonstrate the way in which tradition and contemporary aesthetics flow together in this luxurious, yet tranquil bathroom environment.

A classic Georgian home with a modern twist

Charlotte Conway Design has become synonymous with the creation of unique bathroom environments that utilise modern practices which accentuate the classic features of the homes Charlotte works with.

A keen collector of fine art and beautifully crafted bespoke furniture, the client wanted their dated Master en-suite to reflect their love of classical design, but with a modern twist.

This design showcases the very best of British craftsmanship; the Samuel Heath Swarovski crystal brassware glistens in the mood lit bathroom. Lighting has been carefully considered, to allow the clients to truly pamper themselves. The marriage between marble, crystal and mother of pearl present the utmost luxury and classical design.

In the second bathroom, Swarovski crystal levers have been employed again and in this context are perfectly suited to the bespoke designed mirror that accounts for much of the wall space in this bathroom. The lever controls and mirror like chrome finish ensure that the space feels light and open, creating a truly unique bath experience.

The gloss black chrome controls of Style Moderne fit comfortably in the third room, where the brassware and tiles are reminiscent of the luxurious 1920's Art Deco aesthetic. The striking geometric lines of the wall mounted tap and concealed shower stand out against the curvilinear highlights that run through the tiles.

The final bathroom incorporates the minimalist Xenon collection which suits the understated and contemporary feel of this en-suite. The custom free standing stone basin helps to give the space an organic resonance and softens the angular forms and simplistic design of the taps and shower.

Fairfield

Contemporary styling creates a boutique feel in this 19th century cottage en-suite. This luxurious bathroom is the main en-suite in a period cottage dating back to 1824. As part of a wider renovation project, the current residents were looking to complement the unique period features of the cottage with more contemporary styling, and wanted their bathroom to have a real 'wow factor', boutique hotel feel. Combining minimalist and classic brassware, the couple mixed the crisp clean lines of a Samuel Heath Xenon shower rose, with the softer curves of Samuel Heath's Fairfield collection for the shower valve and basin taps.

The hand-finished, carefully crafted brassware contrasts beautifully against the feature pearlescent wall, chosen to offer a dramatic, bold design in the simple cottage en-suite. The pearlescent effect reflects daylight or becomes iridescent with the LED coloured lights.

Challenged with covering conventionally uneven walls, large tiles were chosen for the main walls with floor and finger tiles used to wrap around the curve of the window reveal to create the perfect bathroom sanctuary.

Villa Honegg Hotel and Spa

When award winning design company, Jestico + Whiles was commissioned to specify the interior of the luxury five star Villa Honegg Hotel at Ennetbürgen, Switzerland, the company set out to renew the guest experience in a way that would reflect the hotel's striking mountain setting. Combining contemporary design with the heritage of the beautiful period building, the inspiration found in the panoramic lake and mountain views from each bedroom has been used to create stunning boutique bathrooms for each guest, bringing an element of the hotel's grand setting inside. Jestico + Whiles worked alongside Samuel

Heath, using the dedicated service for designers and architects provided through our London showroom at the Design Centre Chelsea Harbour. The service offers one-to-one support for any size specification project, from initial product selection through to project management. The team from Samuel Heath worked with the interior design company to specify the guest bathrooms and spa areas. Fairfield taps and showers were selected for their classic motifs and rich character. Samuel Heath Fairfield showers are also featured in the spa, creating synergy between the wet room spaces.
